January 24, 1974

DEAR ELEC-TRAK TRACTOR DEALER:

Good news! The electric sprayer you have been asking for - Model AK70 - will be available in April. This unit, built by Hudson, will mount on the rear of either the large or small frame tractors (E8M through E20). The sprayer is powered by its own electric motor plugged into tractors equipped with an optional rear PTO outlet (KP36 or 38). The initial production run of sprayers is a limited fixed quantity and sprayers will be shipped on the basis of the first orders placed and approved are the first units shipped.

Sincerely,

J. W. Stackhouse,
MANAGER - PRODUCT PLANNING

JWS/1ba
