RIDER ROLLS RIGHT ON SCHEDULE

Monday, February 4 was "Rider Day" at OPEO as the first ER8-36 Rider Mower rolled off the assembly line. It joins the other seven members of our growing Elec-Trak tractor family.

Amid complimentary coffee and donuts, first shift and office employees watched Acting General Manager, Don White, accept a commemorative set of keys to the first Rider Mower from Pat Palmisano, Manager-Manufacturing. Pictured here following the ceremony, are, left to right, White, Palmisano, Mike Zanolli, Supervisor Manufacturing-Engineering responsible for the manufacturing startup, and Chick Gruber, Manager-Development Engineering.
