Mounting Bracket for Spout
Control Arm on Snow Blowers

MACHINE AND MODEL

SUBJECT

When the snow thrower is mounted on an EGT 120 - 150 tractor in conjunction with the cab, it will be necessary to move the spout control mounting bracket "A" in one hole on the floor as shown in above photo. The mounting bracket support which mounts underneath the floor platform cannot be used in this application. Replace support with two (2) flat washers.
