INDUSTRIAL TRACTOR

## OUTDOOR MAINTENANCE & GROUNDS CARE

### Mowing/Snow Throwing (AA42, AD42)

Most grounds care problems can be solved by an I-5 Elec-Trak<sup>®</sup> groundskeeping attachment or tool. Five different mowers, two plow blades, a hefty snow thrower, even a chain saw are

available. All plug into the I-5 Elec-Trak<sup>®</sup> tractor; attach and detach quickly. All operate at full efficiency regardless of tractor drive motor speed.

#### MOWING

#### SPECIFICATIONS

##### MOWERS

Rotary	42-inch cut
(AA42R)	Front mounting
(AA42S)	Side or safer rear discharge option
	Range: up to 3.5 acres per recharge*
	Cutting height from 1.5 to 3.5 inches

##### Reels

(AR56)	57/56-inch cuts
(AR57)	Range: up to 5 acres per recharge*
	Adjustable cutting heights

##### Sickle Bar

(AM48)	48-inch cut
	Easily mounts to rear of I-5 tractor
	Cuts heavy undergrowth
	Large cutting arc allows cutting at many angles, including vertically for hedgerows
	Lift handle adjusts angle or lifts for transporting
	Range: up to 5 acres per recharge*

#### SNOW THROWING

\*Up to 50-60% more range available with addition of optional Power Pack Booster (AP84).

##### SNOW THROWER

(AD42)

Instant start any weather  
 42-inch swath  
 Chain driven auger, single stage  
 270° chute rotation controlled from driver's seat  
 Plugs into three-prong power take-off receptacle  
 Range depends on snow conditions  
 Requires chains (AP68) and weight box (AP85)  
 or auxiliary power pack (AP84)  
 Enclosed cab with electric windshield wiper available (AG55)

I-5 Elec-Trak tractor, attachment specifications and standard equipment are subject to change without notice.

# Dozer Blade & V-Plow (AB48 and BV48)

These two economical plow blades attach to the I-5 Elec-Trak<sup>®</sup> tractor in minutes to clear snow or push loose material quickly and quietly. Your driver can choose three angles of attack for the dozer blade without leaving the seat. The V-plow is designed for extra-fast snow clearance on long straight stretches. Both blades are raised by the I-5's standard electric lift. The dozer blade and V-plow require the implement mounting bracket (AP56). For snow removal chains (AP68) are recommended. Add the Power Pack Booster (AP84) for those big jobs and increase the I-5 Elec-Trak<sup>®</sup> tractor range 50-60%.

## Specifications

	AB48	BV48
Width	48"	48"
Depth of blade	17 $\frac{3}{4}$ "	18"
Angles of attack	45° r. or l. 90°	45° each blade
Replaceable steel wear blade	X	X

## Hand Tools

Take down trees or pull up weeds with one of the thirty-six-volt hand tools that plug into the I-5 Elec-Trak<sup>®</sup> tractor. With the tractor as the power source, work is completed with electric efficiency

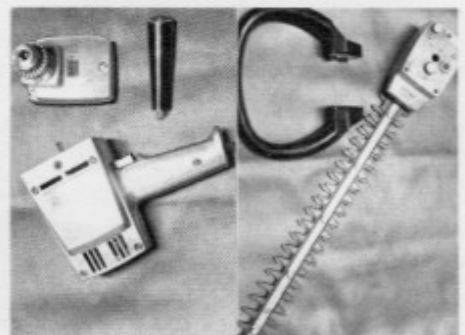

anywhere, without lengthy 110-volt extension cords. The twist-lock plug prevents pull-out while working. A 25-foot extension cord (HT25) is available.

Chain saw (HS13) utilizes tough DC motor to cut logs up to eight inches thick. Thumb operated chain oiler, 13-inch blade.

Weeder Cultivator (HC05) makes your shrubby borders look great, keeps the weeds underground. A time saver. Requires extension cord (HT25).

Just like the I-5 Elec-Trak<sup>®</sup> tractor system, the power handle (TM3) accepts a variety of accessories, including the drill head (TH20), and hedge clippers (TH70).

I-5 Elec-Trak tractor, attachment specifications and standard equipment are subject to change without notice.
