John Deere Electric 90 Mower
 1972 Model (Serial No. 1001-10000)
 1973 Model (Serial No. 10001-11704)
 1974 Model (Serial No. 11705-13204)

John Deere Electric 96 Mower
 1975 Model (Serial No. 30001-)

EXPLANATION OF SERIAL NUMBER LISTING

An individual serial number is assigned to each mower. On machines built after June 1974, this number consists of thirteen letters, numbers, or spaces. The first letter indicates the "family of machine" (mower); the next three numbers or letters, the "model or machine designation"; the letter in the fifth position indicates the "model year". This is followed by a space (for computer purposes) and a six-digit serial number and the letter "M" denoting Horicon as the factory of manufacture. When ordering parts, use only the six-digit serial number. When writing about or filling out warranty claims, use all thirteen numbers, letters and spaces shown on the mower serial number plate.

Serial number information is listed parenthetically to show on which machines each part can be used. These listings are explained by the following examples.

- (-) The part can be used on all machines.
- (000000-) The part can be used on all machines beginning with the serial number listed.
- (-000000) The part can be used on all machines up to and including serial number listed.
- (000000-000000) The part can be used on all machines between and including the serial numbers listed.

Where XXXXXX's are listed in place of a serial number it indicates a serial number change was made but the exact serial number had not been established when the catalog went to press.

AN EXPLANATION OF CHANGE INDICATOR LINE

New and revised information is identified by vertical lines marked on the left-hand margin of revised pages. These lines indicate changes affecting the ordering of parts.

SI (International System) Units of Measure

Metric equivalents have been included, where applicable, throughout this parts catalog.
